

SNEHESH MUNDALE

Software Engineer

8483869326 | mundale.snehesh@gmail.com | Navi Mumbai

PROFILE

Software Engineer with 2+ years of experience in software engineering, full-stack development, backend development, and enterprise application development. Extensive experience in Golang, REST API development, relational database design, SQL, React JS, microservices, and scalable system design. Hands-on experience building CRM, ERP, CPaaS, workflow automation, KPI dashboards, secure document management systems, and analytics platforms. Proven ability to improve process efficiency, automate operations, optimize performance, maintain data integrity, and collaborate with cross-functional teams in Agile environments. Seeking Software Engineer, Backend Engineer, or Full-Stack Engineer roles focused on high-scale systems, backend services, APIs, cloud infrastructure, and business-critical platforms.

CORE SKILLS

- **Programming Languages:** Go (Golang), Java, JavaScript, C++, SQL, PL/SQL
- **Backend Development:** REST API Development, Microservices, Authentication, Authorization, JWT, OAuth2, Node.js, Concurrency, Multithreading, Goroutines, Channels, Clean Architecture, SOLID Principles, Design Patterns
- **Frontend Development:** React JS, Angular, HTML5, CSS3, SCSS, Responsive UI Development
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB, Redis, Data Modeling, Query Optimization, Indexing, Normalization, Denormalization, ACID Properties, Database Migration
- **Cloud and DevOps:** Docker, Kubernetes, CI/CD, Git, Azure Repos, AWS (Foundational), Google Cloud Storage (GCS), Linux
- **Workflow Automation and Integration:** n8n, Webhooks, API Orchestration, Internal Tooling, Business Process Automation
- **Monitoring and Logging:** ELK Stack, Grafana, Log Analysis, Application Monitoring
- **Tools:** Postman, Swagger/OpenAPI, Visual Studio Code, IntelliJ IDEA, Eclipse
- **Computer Science Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

WORK EXPERIENCE

Jio Platforms Limited

May 2024 – Present

Software Development Engineer-1 (SDE-1)

- Built and delivered internal **CPaaS enterprise platforms**, including **JioCX CoreOps**, supporting **SMS, RCS, WhatsApp, EasyPhone, and Voice** services, establishing standardized workflows for onboarding, billing, and revenue operations, improving data visibility by **45%** and operational efficiency by **20%**.
- Worked across frontend and backend to build **scalable, high-availability applications** using **Golang and React**, leveraging **profiling (pprof)** and **benchmarking** to identify bottlenecks and optimize latency, throughput, and resource utilization.
- Architected and refined **relational data models** and database schemas, improving query performance by **25%** while ensuring data integrity, consistency, and efficient analytics workflows.
- Constructed and optimized **RESTful APIs** and backend services for **system integrations and analytics pipelines**, ensuring high **attention to detail** in revenue calculations, improving response times by **20%** and strengthening system reliability and data flow.
- Established a secure **document management system** using **Google Cloud Storage (GCS)** with encryption, **RBAC**, watermarking, and audit logging, leveraging **WebSockets** for real-time updates and improved document traceability.
- Streamlined and automated **internal workflows, alerts, and support processes** using backend orchestration, reducing manual effort by **40%** and improving operational turnaround time.
- Collaborated with product, sales, legal, and finance teams to align process flows and system logic, demonstrating strong **communication** and **problem-solving** to resolve cross-functional issues, reducing customer onboarding time from **2-3 days to <1 day** and enabling **current-month revenue predictions** for faster decision-making.
- Gained foundational knowledge of **Docker, CI/CD pipelines, and Azure Repos/Git**.

EDUCATION

C-DAC - Center for Development of Advanced Computing, Mumbai

Sept 2023 – Mar 2024

PG Diploma - Development of Advanced Computing

G.H. Raisoni College of Engineering, Nagpur

June 2018 – June 2022

Bachelor of Engineering - Mechanical Engineering

PROJECTS

JIOCX – CoreOps Platform (SMS, RCS, WhatsApp, EasyPhone, Voice)

- Built a full-scale **CRM and ERP platform** for CPaaS services to streamline the complete customer lifecycle from client onboarding and proposal management to billing, collections, and revenue realization.
- Formulated a **modular backend system in Go** for account management, proposals, legal workflows, sales orders, billing, revenue recognition, and internal business operations.

- Architected relational **client master data models** and established secure document storage on **Google Cloud Storage (GCS)** with encryption, **RBAC**, and watermarking, ensuring data protection, controlled access, and compliance.
- Integrated financial records including **Tally data**, purchase orders, agreements, amendments, and billing documents to maintain accurate, auditable, and compliant business transactions.
- Enabled internal collaboration through **Notes, Chat, Audit Logs**, and automated email alerts for dues tracking, client status monitoring, and operational coordination.

KPI Dashboard Portal (Performance and Analytics for CPaaS Products)

- Built a real-time KPI dashboard to track SMS, RCS, WhatsApp, and Email traffic along with revenue metrics, usage trends, and customer performance indicators, leveraging **Concurrency: Goroutines, Channels, WaitGroups, Mutexes**.
- Enabled business leaders, customer success managers, and support teams to analyze client engagement, campaign performance, service utilization, and revenue contribution.
- Strengthened business decision-making for retention planning, service optimization, and growth initiatives through centralized analytics and reporting.

Jio Prism (Examination and Proctoring Platform)

- Built a multi-tenant online examination platform with tenant isolation, role-based access control, and scalable architecture for secure exam operations.
- Delivered backend services in **Golang** and a responsive frontend using **React JS**, demonstrating strong **time management** while implementing **unit and integration tests** to validate business logic, ensure API reliability, and improve system stability for concurrent exam workflows.
- Optimized system performance by integrating **Redis caching** and improving backend processing to support concurrent exam sessions and scalability.
